V I S I O N

Interactive entertainment is exploding for one simple reason: everyone yearns to experience their wildest dreams and live out their greatest fantasies. Climb into the ring and take a swing at the heavyweight champ. Take control of a top-secret attack helicopter on covert missions in enemy territory. Technology makes it possible. But vision makes it real, makes it an experience, makes it extreme.

B O T T O M L I N E

No magic. No secret formulas. We just work from know-how. We start with big-name licenses and properties. We entrust development only to proven, top-notch organizations. Our marketing programs are driven aggressively by the best in the business. Most importantly, we make certain it's a good game and not just a product. After all, the bottom line is entertainment . . . Extreme Entertainment.
